

THE CALIFORNIA COLLECTION

RICH IN STYLE AND DESIGN

In the mid 1980s, Acker-Stone played a significant role in developing the interlocking paving stone market in the U.S. Through the introduction of innovative manufacturing techniques and ongoing product refinements, the company continues to lead the industry with the development of new and enduring paving stones.

Our long history of design and engineering excellence paired with your unique vision will build an inspired, welcoming personal retreat.

Acker-Stone invites you to create enduring beauty with a level of quality and consistency you can depend on for years to come.

SEALANT TECHNOLOGY

ACKER-LOCK

Standard for Coastal & Palermo

ACKER-LOCK *plus*

Standard for Umbriano

Acker-Lock is unlike the conventional processes of sealing pavers. This system is part of the production process, resulting in pavers that are easier to clean and offer long-lasting, 360 degree protection.

EASIER, LESS FREQUENT CLEANING

Concrete and natural stone, have fine capillaries which trap moisture and dirt. Acker-Lock is a part of the production process and permanently bonded within the paver; tire marks, dirt, and normal everyday stains can quickly and easily be removed.

LONG-LASTING PROTECTION

Colors and surfaces protected with Acker-Lock weather considerably less than treated and conventionally sealed pavers. This system counteracts wear and tear making the surface less susceptible to aging.

TRIED AND TESTED

Perfectured by our overseas partners and German engineers over a decade ago, the Acker-Lock system is a proven technology that takes paver protection to the next level.

Displaying stain resistance and easy cleaning on Umbriano

	Acker-Lock	Acker-Lock <i>Plus</i>
Reduced dirt absorption	✓	✓

Algae & moss inhibiting	✓	✓
Enhanced resistance to weathering	✓	✓
Frost & de-icing salt resistance	✓	✓
Reduced efflorescence	✓	✓
Zero efflorescence		✓
Sealing not required		✓
Water repelling top & bottom		✓
Zero reapplication required		✓
360° permanent protection		✓

EXCLUSIVE COLLECTION

UMBRIANO®

UMBRIANO® paving stones feature a patented 360 degree integral sealing process, Acker-Lock Plus, that protects and shields against ground moisture, reduces efflorescence, decreases everyday surface stains, and is easy to clean. These pavers feature a randomized color application which ensures no repeating patterns over large surfaces, offering you an unparalleled level of uniqueness.

COASTAL

Acker-Stone's Coastal Series integrates mother of pearl shells with our innovative manufacturing techniques to produce an extraordinarily breathtaking and highly durable hardscape solution. Coastal features Acker-Lock, a patented 360 degree integral sealant. The grind finish provides a smooth, polished surface that exposes the shells and aggregates, leaving a one-of-a-kind look.

COLOR BLENDS

Through Mix Colors

Through Mix (TM) pavers have color throughout the entire paver. The face of the paver is more coarse in nature than that of a Face Mix (FM) paver. It's important to note that with Through Mix pavers the shades and depths of colors will vary greatly.

Combo Classic in Charcoal Brown Buff TM

Customize your blend and mixes

Face Mix Colors

A Face Mix (FM) paver is created by applying a layer of fine aggregate, cement and color to the top surface of a concrete paver. This process provides rich, vibrant colors, a smoother more refined texture and greater abrasion resistance.

SPECIAL FINISHES

Grind

Shot Blast

Grind & Shot Blast

Hammered

Tumbled

Grind & Tumbled

Textures create and enhance the overall natural beauty of your project. Add a unique finish to bring out a smooth surface revealing the embedded stones, or a grittier option that accents the natural stone look. Whatever aesthetic you strive for, we have an option for your design.

PRODUCT DETAILS

COLOR SWATCHES

Due to the inherent nature of printed literature and current digital media, Acker-Stone cannot guarantee exact color matching from use of printed color swatches. The materials that are used in Acker-Stone's pavers and walls deliver a range of natural colors that closely match those used in physical samples, catalogs, web sites, color swatch photography and digital images. Pavers and walls will vary slightly due to the environmental conditions. Therefore, color swatch photographs are an approximate representation of color and not an exact match. Final color selection should be made from physical product. If there are discrepancies, contact Acker-Stone sales representative before project installation commences. Installation of product constitutes its acceptance.

EFFLORESCENCE

Efflorescence is a naturally occurring process in all concrete products that sometimes appears in the form of a white powdery substance on the surface. It does not compromise the functionality or structural integrity of the product. Although efflorescence cannot be completely prevented, it will wash off over time and can be cleaned with efflorescence cleaner. Acker-Stone accepts no responsibility or liability for this condition.

COMPACTION EQUIPMENT

Paving stones with an embossed, slate surface or face mix surface finish are more susceptible to scuffing from compaction equipment used in most paver installations. Acker-Stone recommends the use of a urethane mat between the plate and the paver surface when compacting. Contact your equipment supplier for information about accessories for this purpose. Acker-Stone will not be held responsible for damage caused by the misuse of compaction equipment, leaving scuff marks, or burns on pavers.

PROPER COLOR DISTRIBUTION THROUGH LAYING TECHNIQUES

Proper installation enhances the overall color of the pavement surface. Pavers should be selected from at least three separate pallets and then randomly mixed. This creates an attractive and subtle blend of color.

SPECIFICATIONS

Subtle variances in production and environmental factors could affect the density, weight, and definite sizes of each paver. All specs listed on product pages are approximates and nominal to the actual weight and sizing of our pavers and pallets

WARRANTY

Acker-Stone provides a lifetime guarantee on the structural integrity of its paving stones to the original single-family home purchaser. Poor or faulty installations that are not in compliance with ICPI guidelines will render this guarantee null and void. Replacement labor and transportation costs are not included in this guarantee.

This warranty does not apply to any breakage, chipping, natural wear or other deterioration that was caused from improper design or installation which does not comply with applicable codes, the ICPI (Interlocking Concrete Pavement Institute), NCMA (National Concrete Masonry association) and recognized work procedures. Please visit www.icpi.org and www.ncma.org for more information on installation specifications. This warranty does not apply to any damage resulting from a natural disaster or from a deliberate and/or negligent act on the part of the purchaser, owner of the building, installer or any third party. For more information about the commercial warranty, please contact your Acker-Stone representative.
